

Mark 686G Series

Air-Loaded Globe Style Pressure Regulators

The Mark 686G is a cage trim pressure reducing valve that features air-loading, high capacities, accurate regulation, and easy servicing, making it an exceptional choice for your pressure regulating applications. The bottom-entry cage trim allows simple cleaning or repair – all working trim parts can be removed from the body as one assembly. The diaphragm is easily accessible from the top, allowing maintenance without removing the valve from the line.

OPERATION

The set point is adjusted by controlling the air pressure that is supplied to the top of the diaphragm. The supplied air pressure opens the valve to allow the process media to pass through the seats. The downstream pressure is sensed beneath the diaphragm through a downstream sensing tap. As the downstream pressure exceeds the loading pressure, the plug moves toward the closed position.

FEATURES

- Easy to maintain and service — remove bottom entry cage to access plug. Diaphragm is accessible from the top
- Large effective diaphragm area — for increased accuracy and sensitivity
- Large orifices and body passages — provides high flow capacities
- Tight shutoff — choice of hard (ANSI Class IV) or soft (ANSI Class VI) seat
- For applications with differential pressure up to 300 psi (20,7 bar) on water, air, oil, gas, steam and chemicals

SPECIFICATIONS

Sizes: 1/4" through 2" (DN8 through DN50)

End Connections

- Threaded – NPT, BSPT, BSPP, Socket Weld
- Flanged – 150#, 300#, PN10, PN16, PN25, PN40

Body Materials

- Ductile Iron
- Bronze
- Carbon Steel
- Stainless Steel

Plug: 17-4 Ph Stainless Steel

Plug Seat

- Buna-N
- Viton
- Hardened 17-4 Ph Stainless Steel

Dome: Cast Iron

Diaphragm

- Standard – Buna-N/Nylon
- Optional – Jorlon, Stainless Steel or Viton/Nomex

Shutoff

- Hard Seat – ANSI Class IV
- Soft Seat – ANSI Class VI

Maximum Inlet Pressure: 300 psi (20,7 bar)

Maximum Temperature

- 200°F (93°C) with Buna-N plug and diaphragm
- 350°F (177°C) with Viton plug and Viton or SST diaphragm
- 500°F (260°C) with metal seat and SST diaphragm

Minimum Temperature

- -20°F (-29°C) with Buna-N plug and diaphragm
- -15°F (-26°C) with SST diaphragm and SST or Viton plug
- -20°F (-29°C) with SST diaphragm and Buna-N plug

Pressure Recovery Factor F_L : 0.9

Cv (Kv) Values

Valve Size (DN)	Orifice Size		Valve Flow	
	inches	mm	Cv	Kv
1/4" (DN8)	0.47	12	2.2	1,9
